SOAL

1. SOAL 1

Source Code

```
package main

import "fmt"

func main() {

    var pengeluaran, lamaJoin int

    fmt.Scan(&pengeluaran, &lamaJoin)

    if pengeluaran >= 5000 && lamaJoin >= 24 {

        fmt.Println("VVIP Backstage")

    } else if pengeluaran >= 2000 && lamaJoin >=12 {

        fmt.Println("VIP Soundcheck")

    } else if pengeluaran >=500 {

        fmt.Println("Festival Ground")

    } else {

        fmt.Println("Menonton dari Youtube")

    }

}
```

Screenshoot program

Deskripsi program

menggunakan variable x dan y dan menggunakan if jika user meng input x diatas 6k dan y di atas 24 maka output akan berupa vvip backstage. jika user meng input x diatas 2k dan y di atas 12 maka output akan berupa vip Soundcheck. jika user meng input x diatas 500 maka output akan berupa festival ground. jika user meng input x diatas 100 maka output akan berupa Menontoon dari youtube.

2. SOAL 2

Source Code

```

package main

import "fmt"

func main() {

    var x,y,i,t int64

    fmt.Scan(&x)

    t=0

    for i=1;i<=x;i++){

        fmt.Scan(&y)

        if y > 75{

            fmt.Println("Juri bilang: Yes")

            t+=1

        } else {

            fmt.Println("Juri bilang: No")

```

```
}

}

fmt.Printf("Total Yes: %d",t)

}
```

Screenshoot program

Deskripsi program

3. SOAL 3

Source Code

```
package main

import "fmt"

func main() {

    var x,i,j int64

    fmt.Scan(&x)

    for i=1;i<=x;i++){

        for j=1;j<=i;j++){

            fmt.Printf("%d ",i)

        }

        fmt.Println()

    }

}
```

Screenshoot program

The screenshot shows a Go program in a terminal window. The program reads a number '5' and prints a pattern of asterisks. A Notepad window is overlaid on the terminal, showing the user's name and ID.

```
susulan > cd soal3.go > main
1 package main
2 import "fmt"
3
4 func main(){
5     var x,i,j int64
6     fmt.Scan(&x)
7
8     for i=1;i<=x;i++){
9         for j=1;j<=i;j++){
10             fmt.Printf("%d ",i)
11         }
12         fmt.Println()
13     }
14 }
```

PS C:\test> go run "c:\test\susulan\soal3.go"

```
5
1
2 2
3 3 3
4 4 4 4
5 5 5 5 5
PS C:\test>
```

Deskripsi program

4. SOAL 4

Source Code

```
package main

import "fmt"

func main() {

    var x,y,i int64

    fmt.Scan(&x)

    fmt.Println("masukan angka : ",x)

    for i=x; i>=1;i=x{

        y+= x%10

        x= x/10

    }

    fmt.Print("hasil penjumlahan :",y)

}
```

Screenshoot program

The screenshot shows a Go program in a terminal window. The program reads the number '1234' and prints the sum of its digits, which is 10. A Notepad window is overlaid on the terminal, showing the user's name and ID.

```
susulan > cd soal4.go > main
1 package main
2 import "fmt"
3
4 func main(){
5     var x,y,i int64
6     fmt.Scan(&x)
7     fmt.Println("masukan angka : ",x)
8     for i=x; i>=1;i=x{
9         y+= x%10
10        x= x/10
11    }
12    fmt.Print("hasil penjumlahan :",y)
13 }
```

PS C:\test> go run "c:\test\susulan\soal4.go"

```
1234
masukan angka : 1234
hasil penjumlahan :10
PS C:\test>
```
